

32

```
if x == y and a >= b and e < f:  
    print( 'Gotcha' )  
else:  
    print( 'Not you' )
```

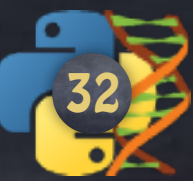

No

```
if x == y and a >= b and e < f:  
    print( 'Gotcha' )  
else:  
    print( 'Not you' )
```

Recall: else is optional

No $a > b$ or $c > d$ and $e > f$ or not g and $x \neq y$

Parenthesis !!

First something...

Stop the loop if item found

```
someList = [1,7,2,4,14,11,9,3]
for item in someList:
    if item > 10:
        print(item)
        break
```
