I/O Files

```python
open('filename', 'r', encoding='utf-8')
```
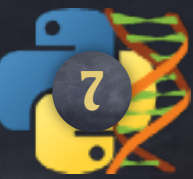

```python
with open('filename', 'r', encoding='utf-8') as the_file:
    for line in the_file:          # the_file is iterable, yeii !
        print(line.rstrip())      # Removing the trailing \n
                                   # since print() adds one.
```
