```python
def functionName(arg1, arg2, arg3):

    someValue = ...  # Make it something

    # Some code with someValue
    # using arg1, arg2, arg3 (or not!)
    #
    # Some more code

    return someValue
```

```python
def functionName(arg1, arg2, arg3):

    someValue = ...  # Make it something

    # Some code with someValue
    # using arg1, arg2, arg3 (or not!)
    #
    # Some more code

    return someValue
```

```
# Some code for x1, x2 and x3
```

Some code using v

```
v = functionName(x1,x2,x3)
```

```python
def functionName(arg1, arg2, arg3):

    someValue = ...  # Make it something

    # Some code with someValue
    # using arg1, arg2, arg3 (or not!)
    #
    # Some more code

    return someValue
```
